

WBIS Geography Overview

	Autumn 1	Autumn 2	Spring 1	Spring 2	Summer 1	Summer 2
Reception	Let's Explore Where do we live?	Build It Up Where does it travel?	Once Upon a Time What can I see?	Ready, Steady Grow Where food comes from?	Animal Adventures Where do I live?	On the Beach How is it different?
Year 1	Our Wonderful West Byfleet What can I see? How do I get there?		Bright Lights, Big City What is London like? How is it the same and different?		School Days How have physical and human features changed over time in our area?	
Year 2	Let's Explore the World Where are we? What's the climate?		Coastline What is Whitby like? What are the features?		Magnificent Monarchs What are the UK significant places for Royals?	

At West Byfleet Infant School, our aim is to provide Geography lessons which stimulate curiosity in the children, compelling them to want to discover more about our wonderful planet and to learn more about what humans need to do to protect its future.

As an Eco Green Flag school we are passionate about ensuring all pupils participate and have a good understanding of conservation of the Earth.

We do this through the provision of enrichment activities and experiential learning which ensures that content is delivered in a fun, engaging manner.

We are eager to offer outdoor field work opportunities for children to make connections and see changes in real-life environments.

We encourage the children to celebrate the cultural diversity of the countries they research and support them to respect the world they live in.
